

Amendments to the Specification

Please replace the Sequence Listing filed with the Application with the Sequence Listing attached hereto.

Please delete the paragraph on page 7, lines 9-15 and replace it with the following paragraph:

Such a sequence is preferably a sequence in a coding region, which is located 75 nucleotides or more downstream of a start codon. Information regarding the nucleotide sequence of KLF5 cDNA can be obtained from nucleotide sequence database such as GenBank. For example, with regard to sequence information, the sequence of mouse KLF5 cDNA can be obtained from GenBank Accession No. NM_009769 (SEQ ID NO: 49 (DNA) and SEQ ID NO: 51 (protein)), and the sequence of human KLF5 cDNA can be obtained from GenBank Accession No. AF287272 (SEQ ID NO: 50 (DNA) and SEQ ID NO: 52 (protein)).

Please delete Table 1 on page 16 and replace it with the following table:

Table 1

Sequence selected	Sequence position in SEQ ID NO: 49	GC content	Produced RNA sequence	SEQ ID No.	siRNA No.
